

PROJECT 4 – SaaS CRM PRODUCT ANALYTICS

Created By : Amit Kumar

Tools Used : Excel | MySQL | Power BI | DAX

PAGE 1 – BUSINESS OVERVIEW

Total MRR

Purpose: Monthly recurring revenue generated from active subscriptions.

```
Total MRR =  
CALCULATE(  
    SUM(crm_subscriptions_clean[mrr]),  
    crm_subscriptions_clean[status]="Active"  
)
```

Total ARR

Purpose: Annual recurring revenue.

```
Total ARR =  
CALCULATE(  
    SUM(crm_subscriptions_clean[mrr]),  
    crm_subscriptions_clean[status]="Active"  
) * 12
```

Total ARPU

Purpose: Average revenue generated per active customer.

```
Total ARPU =  
ROUND(  
    DIVIDE(  

```

```

        CALCULATE (
            SUM(crm_subscriptions_clean[mrr]),
            crm_subscriptions_clean[status]="Active"
        ),
        CALCULATE (
            DISTINCTCOUNT(crm_customers_clean[customer_id]),
            crm_subscriptions_clean[status]="Active"
        ),
        0
    ),
    2)

```

Trial Conversion Rate

Purpose: Percentage of trial users converted into paying customers.

```

Trial Conversion Rate =
DIVIDE (
    CALCULATE (
        COUNT(crm_customers_clean[customer_id]),
        crm_customers_clean[trial_converted]="Yes"
    ),
    COUNT(crm_customers_clean[customer_id]),
    0
)

```

Churn Rate

Purpose: Percentage of subscriptions lost.

```

Churn Rate =
DIVIDE (
    CALCULATE (
        COUNTROWS(crm_subscriptions_clean),
        crm_subscriptions_clean[status]="Churned"
    ),
    COUNTROWS(crm_subscriptions_clean),
    0
)

```

Total Customers

Purpose: Total customers in the CRM system.

```
Total Customers =  
DISTINCTCOUNT(crm_customers_clean[customer_id])
```

Upgraded Revenue

Purpose: Revenue generated through upgraded subscriptions.

```
Upgraded Revenue =  
CALCULATE(  
    SUM(crm_subscriptions_clean[mrr]),  
    crm_subscriptions_clean[status]="Upgraded"  
)
```

PAGE 2 – CUSTOMER ANALYTICS

Active Users

Purpose: Customers with active subscriptions.

```
Active Users =  
CALCULATE(  
    DISTINCTCOUNT(crm_subscriptions_clean[customer_id]),  
    crm_subscriptions_clean[status]="Active"  
)
```

Upgrade Rate

Purpose: Percentage of customers who upgraded plans.

```
Upgrade Rate =  
DIVIDE(  
    CALCULATE(  
        DISTINCTCOUNT(crm_subscriptions_clean[customer_id]),  
        crm_subscriptions_clean[status]="Upgraded"  
    ),  
    DISTINCTCOUNT(crm_subscriptions_clean[customer_id]),
```

```
0  
)
```

Average LTV

Purpose: Average customer lifetime value.

```
Avg LTV =  
AVERAGEX(  
    VALUES(crm_subscriptions_clean[customer_id]),  
    CALCULATE(  
        SUM(crm_subscriptions_clean[mrr])  
    )  
)
```

Enterprise Customers %

Purpose: Percentage of customers belonging to Enterprise segment.

```
Enterprise Customers % =  
DIVIDE(  
    CALCULATE(  
        DISTINCTCOUNT(crm_customers_clean[customer_id]),  
        crm_customers_clean[company_size]="Enterprise"  
    ),  
    DISTINCTCOUNT(crm_customers_clean[customer_id]),  
    0  
)
```

PAGE 3 – CHURN ANALYSIS

Churned Customers

Purpose: Total customers who cancelled subscriptions.

```
Churned Customers =  
CALCULATE(  
    DISTINCTCOUNT(crm_subscriptions_clean[customer_id]),  
    crm_subscriptions_clean[status]="Churned"
```

)

Churn Rate

Purpose: Percentage of customers churned.

```
Churn Rate =  
DIVIDE(  
    [Churned Customers],  
    DISTINCTCOUNT(crm_subscriptions_clean[customer_id]),  
    0  
)
```

MRR Lost

Purpose: Revenue lost due to customer churn.

```
MRR Lost =  
CALCULATE(  
    SUM(crm_subscriptions_clean[mrr]),  
    crm_subscriptions_clean[status]="Churned"  
)
```

Retention Rate

Purpose: Percentage of retained customers.

```
Retention Rate =  
DIVIDE(  
    CALCULATE(  
        DISTINCTCOUNT(crm_subscriptions_clean[customer_id]),  
        crm_subscriptions_clean[status]="Active"  
    ),  
    DISTINCTCOUNT(crm_subscriptions_clean[customer_id]),  
    0  
)
```

Net Revenue Retention (NRR)

Purpose: Revenue retained after accounting for churn.

```
NRR =  
DIVIDE(  
    [Total MRR]-[MRR Lost],  
    [Total MRR],  
    0  
)
```

PAGE 4 – USAGE & ENGAGEMENT

Average DAU

Purpose: Average Daily Active Users.

```
Avg DAU =  
AVERAGE(crm_usage_clean[dau])
```

Average MAU

Purpose: Average Monthly Active Users.

```
Avg MAU =  
AVERAGE(crm_usage_clean[mau])
```

Average Stickiness

Purpose: Measures user engagement frequency.

```
Avg Stickiness =  
AVERAGE(crm_usage_clean[stickiness])
```

Average Features Used

Purpose: Average number of product features used.

```
Avg Features Used =  
AVERAGE(crm_usage_clean[features_used])
```

Average NPS

Purpose: Measures customer satisfaction and loyalty.

Avg NPS =
`AVERAGE (crm_usage_clean[nps_score])`

BUSINESS KPIs COVERED

✓ MRR

✓ ARR

✓ ARPU

✓ Trial Conversion Rate

✓ Upgrade Rate

✓ Customer LTV

✓ Churn Rate

✓ Retention Rate

✓ NRR

✓ DAU

✓ MAU

✓ Stickiness

✓ NPS

✓ Upgraded Revenue

✓ Enterprise Customer Analysis

PROJECT SUMMARY

Customers : 1,500

MRR : \$2.78M

ARR : \$33.3M

ARPU : \$1.85K

Trial Conversion Rate : 66.6%

Churn Rate : 19.98%

NRR : 77.98%

Dashboard Pages : 6
